## How This Trap Works

1  
Mouse climbs the provided ramp toward the bait located inside of the tunnel.

2  
Mouse will inch out onto the counter weight platform to eat the bait.

3  
The mouse's weight will trigger the platform to fall forward.

4  
The platform will then automatically reset for the next mouse.

**NOTE: Bucket not included**

## Where to use this trap?

Indoor

Outdoor

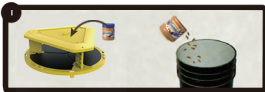

Farms

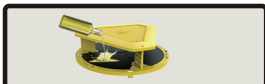

Storage room

## Setup Instructions

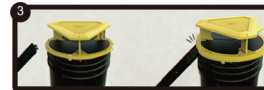

1  
(1) Bait the trap by spreading peanut butter under the front side of the bucket lid  
Recommended: Sprinkle sunflower seeds/nuts in the bucket

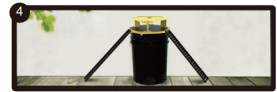

Before use, apply an appropriate amount of sesame oil evenly on the black automatic flip cover to effectively enhance smooth opening and closing, significantly improve the user experience, and achieve better overall performance.

2  
(2) Snap trap on to a standard-sized 5 Gallon Bucket  
\*Verify bucket top is not warped or deformed\*  
\*Verify clips on trap lid are not bent inwards\*

3  
(3) Assemble the provided ramp; press the two tabs into the slot located on the side of the lid

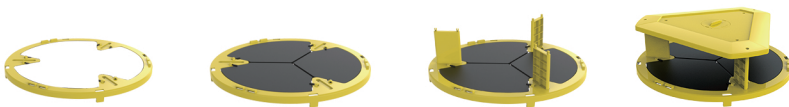

4  
(4) Place the trap along a wall where mouse activity is known

5  
(5) Optional: Fill bucket 1/2 way up with water or oil, this makes the trap lethal
